

Release Notes

Tosska In-Memory Maestro for Oracle® 1.2.0

Release Notes

August 2017

About Tosska In-Memory Maestro for Oracle®

Tosska In-Memory Maestro (TIM™) for Oracle® automates the In-Memory SQL optimization process and provide In-Memory objects recommendations for a SQL or even a given SQL workload with our proprietary artificial intelligent engine.

A user friendly In-Memory simulation function are also provided to help user to evaluate any prefer In-Memory table objects for a SQL workload captured from SGA or AWR without the need to populate those objects.
